

Lake Trout

Salvelinus namaycush

**Cleveland
Metroparks®**

ADULT SIZE

Typically 15-36 inches and weighing 1-20 pounds, can reach up to 26 pounds in Ohio.

TYPICAL FOODS

Voracious predators of fish, but also eat crayfish and insects/insect larvae.

FISHING TIP

Lake trout are making somewhat of a comeback in Lake Erie, and a modest number are caught annually by steelhead anglers fishing bait and lures around river mouths and occasionally in the rivers in fall. The Pennsylvania and New York waters of Lake Erie from Erie east offer a viable lake trout fishery these days.
